- Large top salt opening
- New LCD touch screen
- Vacation mode
- Leak detection sensor
- Tricolored indicator light for -
 - (1) Low Salt
 - (2) Service Mode
 - (3) Regeneration Mode
- Post-brine refill

Which is difference between Downflow and Upflow Models? Downflow or Upflow refers to the way the salt brine is drawn into the softener during regeneration.

The upflow softener brings brine into the bottom and flows up through the resin. This saves on salt and is more efficient regeneration of the resin as compared to downflow.
